Deep Energy and Eavor to Build Five Geothermal Projects

Eavor's closed-loop geothermal systems extract heat energy from an isolated network of wellbores, akin to a deep underground radiator. Together, the five closed-loop projects are expected

Global energy majors lead pivot to Eavor's geothermal solution with

Eavor's technology differs from other forms of geothermal in that it is a scalable "go anywhere" solution, harvesting geothermal heat to generate dispatchable power with zero emissions.

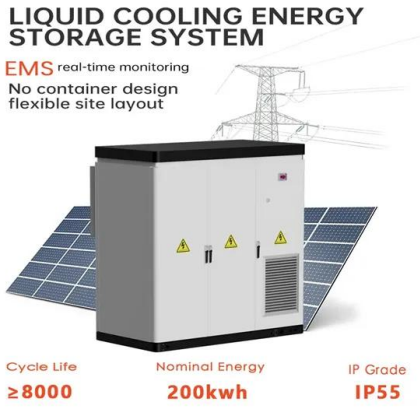

2024: next-generation geothermal energy's breakout year

Geothermal energy experienced substantial momentum in 2024, fueled by milestones in funding, project development, and rising demand for carbon-free, around-the-clock electricity.

Capital Raise of $182 Million Confirms Eavor as the Leader in Scalable

CALGARY, Alberta, Oct. 25, 2023 (GLOBE NEWSWIRE) -- Eavor Technologies Inc., ("Eavor") a pioneer in the field of advanced geothermal

energy solutions today announces the successful completion

When Next-Generation Geothermal Meets First-of-a-Kind Reality

Eavor is a next-generation geothermal energy company that set out to solve one of the long-standing limits of geothermal power. Conventional geothermal electrical generation only works

Eavor Technologies Inc

Eavor Technologies Inc. manufactures and provides renewable energy equipment. The Company offers geothermal power generation technology, closed-loop geothermal technology, as well as provides
