Chifeng new energy windkrafterzeugung

Überblick

Two 1-million-kilowatt wind and solar power bases in Chifeng, North China's Inner Mongolia autonomous region, have begun operation, marking a major step forward in the city's renewable energy development. According to the official website of the People’s Government of the Inner Mongolia Autonomous Region, two major renewable energy transmission projects in Chifeng have been put into operation following the completion of power delivery works at the 500 kV Zicheng Substation. The newly commissioned projects include the power transmission facilities for the China Datang. cn] Designed by China Energy Engineering Group Liaoning Electric Power Survey & Design Institute Co. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active.
