## Überblick

China’s new 1-gigawatt offshore solar farm combines innovative marine technology with clean energy production, powering 2. Construction of the world's largest offshore solar power plant began in China last weekend. This development signals a significant advancement in solar technology and sets a precedent for the global expansion of offshore solar power. China’s state-owned CHN Energy has connected its first batch of photovoltaic units to the grid from its. 5 MW facility with support from Shandong province and the municipality of Qingdao.
