China solar power news

Überblick

16 -- China will add more than 200 million kilowatts of new wind and photovoltaic power generation capacity next year as it accelerates the green and low-carbon transformation of its energy sector, according to the National Energy Work Conference 2026. China has refrained from setting ambitious goals for solar energy in its latest five-year plan, highlighting the sector’s mounting challenges after years of explosive growth. The plan released Thursday at the annual National People’s Congress stopped short of giving a target for solar installations. More than 50 large coal units were commissioned in 2025, up from fewer than 20 a year over the previous decade.

China solar boom helps energy emissions fall slightly in 2025

Simply sign up to the Renewable energy myFT Digest -- delivered directly to your inbox. China's emissions from energy and industry fell slightly last year after a solar boom helped to meet a

China's Five-Year Plan Downplays Solar After Rapid Deployment

China has refrained from setting ambitious goals for solar energy in its latest five-year plan, highlighting the sector's mounting challenges after years of explosive growth.

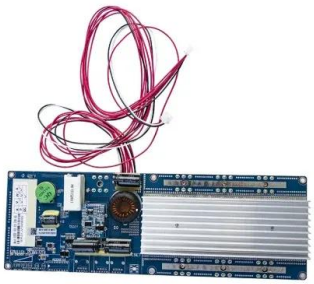

CHN Energy switches on 2 GW solar plant at coal-mining subsidence

The PV facility transforms a coal-subsidence zone into one of China's largest utility-scale solar and transmission hubs. It is part of a 6 GW solar cluster, of which 4 GW are now operational.

Wind and solar are booming in China. So why is it building

The massive growth in wind and solar begs the question: why is China still building coal power plants and, by most analyses, way more than it actually needs? The answer is complicated.

China's solar and onshore wind capacity reaches new

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in

China's Solar Power Generation Overtakes Wind for First Time

(Bloomberg) -- China's solar power generation overtook wind for the first time last year as a boom in cheap panels continues to reshape the country's grid and climate trajectory. The nation

Ray of Hope? China and the Rise of Solar Energy , NBER

Do industrial policies that promote clean energy offer a "ray of hope", increasing a country's growth and welfare, whilst simultaneously reducing carbon emissions? We study the impact of

China Plans to Add Over 200 Million Kilowatts of Wind

(Yicai) Dec. 16 -- China will add more than 200 million kilowatts of new wind and photovoltaic power generation capacity next year as it accelerates the green
