SWISS SOLAR Pro.

Connected energy solutions

Überblick

We provide technology and solutions to dynamically orchestrate electric vehicles (EVs), Ag Tech, Smart Homes, solar, wind, and storage leading to increased efficiency and reliability with improved financial, operational and environmental performance. Just a lower, predictable monthly electric bill backed by the state and utilities — plus a battery that keeps the lights on when the grid goes down. Scalable energy storage solutions, designed and developed in the UK, powering organisations across the UK and Europe. ConnectedSolutions is an innovative battery funding program that offers incentives to residential and commercial electric customers in exchange for allowing their electric utility to draw on the energy stored in their grid-connected behind-the-meter batteries at times of peak electric demand.
