Überblick

DATAKOM SMPS-2420 Generator start battery charger / stabilized power supply (24V/20A). DATAKOM SMPS series are fixed output voltage, current limited lead acid and Nickel-Cadmium battery chargers specially designed for permanent connection to genset starter batteries. This unit ensures batteries remain fully charged without overcharging or gassing, thereby extending battery life. Thanks to their continuous DC outputs they may also be used in a wide range of industrial ap rapid recovery of the missing charge. When the battery voltage reaches the float level, the charger switches to constant voltage charge mode and maintains the battery.
