Überblick

An ESS Home Battery combines lithium-ion cells, battery management systems (BMS), and bi-directional inverters to store/deliver AC power. Systems like Tesla Powerwall or LG Chem RESU feature 90–95% round-trip efficiency and 10-year warranties. Most users charge from 20-80% to preserve battery life, using ~60% of nominal capacity. In the context of energy storage systems (ESS), BYD is one of the global leaders in lithium-ion battery solutions. The company offers different types of batteries optimized for specific applications - residential, commercial and industrial (C&I), and large-scale - all based on its advanced LFP. , LiFePO4 or NMC) typically offer 5–20 kWh capacity, enabling homeowners to shift energy usage to off-peak. The ESS allows your home to store electrical energy in batteries, which can then be released back into your home or even the grid when necessary.
