Fengshang power generation dezentrales windkraftprojekt

Überblick

The project consists of 20 wind turbines, each with a capacity of 5 megawatts, and generates 223 million kWh of clean electricity annually, which can meet the yearly power needs of approximately 230,000 people, said Xu Qiduo, manager of the wind farm, adding that this. Guangxi’s first offshore wind project, the Fangchenggang Offshore Wind Demonstration Project, has been operational for 598 days, marking a major step in the region’s green energy transition. 11 (Xinhua) -- China has achieved another breakthrough in wind power development at ultra-high altitudes, with the world's highest wind power project in Xizang Autonomous Region generating over 22 million kWh of electricity as of Tuesday. Other names: 60MW Tianjin Ninghe Dongjituo (Fengshang) wind farm is a wind farm under construction in Dongjituo Town, Ninghe District, Tianjin, China. The map below shows the approximate location of the wind farm: Your browser is not compatible with Google Maps v3.
