SWISS SOLAR Pro.

Georgias solarkontainerindustrie-layout

Überblick

For a solar module manufacturer, this means access to two distinct and valuable markets from a single production base: westward to Europe via the Black Sea and eastward to Central Asia via the Caspian Sea. The corridor functions as a multimodal system integrating rail, road, and sea transport. Our mission is to serve the community solar industry via government affairs, public relations and coalition building for shared goals among solar providers. Situated on the shortest route between Europe and Asia, Georgia’s transport system is a key link in the historic Silk Road trade network. A rooftop solar array helped a couple in Savannah keep the lights on after Hurricane Helene.
