SWISS SOLAR Pro.

Japans photovoltaik-solarkontainer-kapazitätskonfiguration

Überblick

Japan solar PV net annual capacity additions 2018-2022 and average annual additions 2023-2025 - Chart and data by the International Energy Agency. According to GlobalData, solar PV accounted for 25% of Japan’s total installed power generation capacity and 11% of total power generation in 2023. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Japan Solar PV Analysis: Market Outlook to 2035. Solar energy represents the largest energy-producing renewable energy source in the country. [1] The country was a major manufacturer and exporter of photovoltaics (PV), with a global market share of around 50% in the early 2000s. This ambitious target represents a significant leap from the current capacity of approximately 87 GW (as of 2023, according to PVKnowhow’s Japan Solar Panel Manufacturing Report). Japan has the third highest solar capacity in the world behind China and the United States, but its formerly rapid growth has slowed considerably.
