Longi jinkosolar photovoltaik-module

Überblick

Longi is known for its high-efficiency monocrystalline solar panels, which are ideal for residential and commercial installations. Jinko, on the other hand, provides a diverse range of solar panels, including both monocrystalline and polycrystalline types. HIBC (Hybrid Interdigitated Back-Contact) refers to a high-low temperature composite passivated back contact technology. Domestically, LONGi won the bid for the 800MW module procurement of the Tengger Desert mega-base in Gansu Province at a price of 0. Global solar module shipments reached 536 GW in 2025, with JinkoSolar and LONGi Green Energy Technology leading a highly concentrated market, according to InfoLink Consulting.
