What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Once fully operational, it can produce 56 GWh of lithium batteries and 22 GWh of energy storage modules annually, with an estimated output value exceeding 30 billion RMB annually. Microgrid applications Marshall is developing a smart grid system that will optimise the generation, distribution and use of power across multiple containers and subsystems. We innovate with solar photovoltaic plant design, engineering, supply and construction services, contributing to the diversification of the energy matrix in our. We provide operation and maintenance services (O&M) for solar photovoltaic plants.
