SWISS SOLAR Pro.

Menred ess battery

Überblick

Advanced BMS protection, high cycle life, and smart monitoring capabilities make it ideal for solar storage, off-grid systems, and backup. The configuration represents a high-capacity lifepo battery solution for homes with significant daily consumption or extended. A photovoltaic energy storage system can store excess solar energy in the system for use during peak demand periods, reducing excessive reliance on the grid. This helps avoid high peak electricity prices, optimize the utilization of renewable energy, and enable off-peak usage.
