SWISS SOLAR Pro.

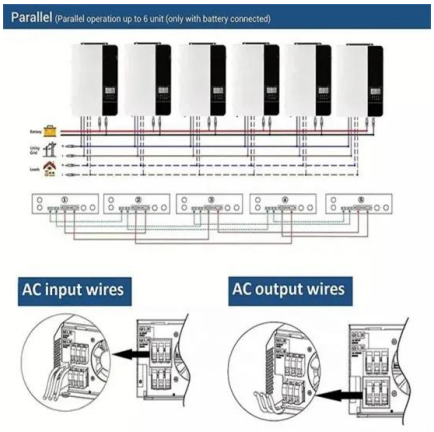

Nationaler nuklearer solarkontainer doha belgien

Überblick

Belgium finalised plans in December 2023 to extend the lifetimes of Doel 4 and Tihange 3 by 10 years, providing capacity of 2 GWe from the reactors, which are 89. The SCK CEN Academy offers a wide range of nuclear training courses, internships and learning opportunities for all future thinkers. We are the world’s centre for cooperation in the nuclear field and seek to promote the safe, secure and peaceful use of nuclear technologies. Waste is also managed from the additional two re the dominant position on the Belgian market. Belgium's new coalition government has announced plans to continue operating two of the country's reactors for an additional 10 years beyond the 10-year extension already agreed - and said it aims to construct new reactors.
