Überblick

A 580-square mile slice of semi-arid desert in southeast Washington that was used to produce nearly two-thirds of the plutonium used in the United States' nuclear weapon stockpile is being reimagined as a 1 gigawatt (GW) solar farm with energy storage. United Nations, Economic Commission for Europe (UNECE), is one of the regional commissions of the United Nations. Set to begin construction and be operational by 2027, the 1,400 MW, 3,100 MWh facility will export more than two million MWh annually – enough to power 785,000 homes. Kseng Solar made a high-profile appearance at PV EXPO Tokyo 2023 by presenting its vast range of solar racking solutions, including roof-mounted, ground-mounted, carport-mounted, all of which were under the spotlight at the event. These solar installations are real, built, and documented proof of humanity's transition to clean energy.
