Photovoltaik-energiespeicherung in myanmar

Überblick

Solar resource and PV power potential maps and GIS data can be downloaded from this section. Aung Zeya said that Myanmar is promoting the use of solar energy to support socio-economic development, industries, and MSMEs, as well as to meet the country’s electricity needs. Even though hydropower is responsible for most electricity production in Myanmar, the country has rich technical solar power potential that is the highest in the Greater Mekong.
