Überblick

2 (users can then switch between the two version on the tool itself) Alternatively the two versions can be accessed by specific urls:. com/en/pvgis-5-3 2• On this homepage, you will find a general presentation of PVGIS. Photovoltaic Geographical Information System (PVGIS) provides a map-based inventory of solar energy resource and assessment of the electricity generation from photovoltaic systems in Europe, Africa, and South-West Asia. How much electricity could photovoltaics produce where I live?

How does production change over the year?

How much does a battery help to use all the. The solar radiation and PV output will change if there are local hills or mountains that block the light of the sun during some periods of the day.
