Shenzhen io smart grid control router

Shenzhen io smart grid control router

SHENZHEN I/O Part #43

Put the code that routes the values in three times: one to route the destination address from dat to the right output pin, one to route the length from acc to same, and one to route everything else in the

Smart Grid Control Router (¥5/278) : r/shenzhenIO

Now that there are 80 verification runs, the best I managed to find for ¥5 is 287 in 14 lines or (the one in this post) 298 in 10 lines. It might also be worth noting

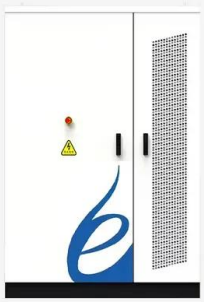

index

SHENZHEN I/O Leaderboard Here are collected all the top scores to the official levels (2 campaigns + 3 bonus levels). The leaderboard collects solution files of all the known top solutions. For every primary

Steam Community :: Guide :: Level Walkthrough()

Give at least one solution to every puzzle I have solved (except Solitaire). And now I began to optimize puzzle, new solution may be totally differetent from the old one. Some of my

Need Help With Smart Grid Router : r/shenzhenIO

The official subreddit for SHENZHEN I/O by Zachtronics. Tried 2 different designs and can't get them to work due to needing 15 lines of code or space constraints.

SHENZHEN I/O
